Priority *to activities*

Bonifacio and Southern Corsica invite all outdoor activity lovers to enjoy the wild and preserved countryside and surroundings all year long. Occasions for big and small to participate in the numerous sports activities on offer : on land, on the sea... and even in the air.

And even better : the Tourist Office of Bonifacio and its partners propose special offers during the months of April and October so you may advantageously discover the joys of hiking, horse riding and mountain biking in the area. Many other activities await you such as adventure climbing, canyoning, a professional 18-hole golf course, mid-mountain climbing and even helicopter flights... and of course, not forgetting boat outings, sailing, kite surfing, kayaking and canoeing, stand up paddle and deep sea diving...! The choice is vast with plenty to do.

THE CULTURAL ACTIVITIES

THE BASTION OF THE STANDARD : A THOUSAND YEARS OF HISTORY

Coming to Bonifacio without visiting the Bastion of the Standard is a little like visiting Paris and not seeing the Eiffel Tower : impossible ! And this year more than ever, the visit will be a more rewarding experience.

Effectively, the Bastion of the Standard offers many pleasurable activities : first the exterior : a signposted circuit with explanations, a botanical garden filled with endemic plants, and a landscaped garden with orientation tables. Now for the interior, an exhibition retracing a thousand years of Bonifacio's history awaits you. Don't forget to ask for the free of charge game book for children on entering.

IN BONIFACIO

THE KING OF ARAGON'S STAIRWAY : TRAVEL BACK IN TIME

The King of Aragon's Stairway, carved by the hands of man into the cliffs, has 187 steps and overhangs the sea from 65 meters. Below an unforgettable path meanders between the sky and the sea which is inaccessible today.

A legend tells us that in 1420 the King of Aragon, Alphonse 5th, wanted to become the leader of Corsica and took siege in the impregnable town of Bonifacio. His soldiers are said to have carved the stairway overnight. The truth is that a crack in the cliff exists since time immemorial and this natural passage, from the Prehistoric era, was constantly improved and became a real stairway.

MONUMENT

BASTION OF THE STANDARD A VISIT NOT TO BE MISSED

2 «FAMILY DAY» :

- **SUNDAY 15TH APRIL** : we await you on the heights of the Bastion of the Standard with activities both pleasant and surprising for the big and small !
Medieval animations, workshops, and a big treasure hunt.
- **WEDNESDAY 31ST OCTOBER** : the month of October ends with a special “Halloween” Family Day. With just enough to frighten the children (just a little) and why not parents and grandparents!

END THE DAY ON A PERFECT NOTE

Every evening of the week, the Bastion of the Standard is open until 10.30 p.m., offering the most spectacular views : the port illuminated by a thousand lights, the rotating lights of the Pertusato lighthouse, as well as the lights of Sardinian villages in the background shining over the horizon.

MONUMENT

THE “GOUVERNAIL” THE RUDDER

Built in 1880 by the French military engineers, the Gouvernail was the surveillance spot at the entry to the port as well as over the entirety of the Strait of Bonifacio. The local fishermen called this site the “Gouvernail” (Rudder) of Corsica due to its shape and geographical position. After descending 168 steps, you will discover a superb view over the entry to the bottleneck and the cliffs of Bonifacio. This is a historical and most original visit not to be missed.
